

# REPCAST HR STEEL

REPCAST HR is a new refractory design with intermediate properties between conventional refractories and iron, main properties are high resistance to impact, abrasion, oxidizing and reducing atmospheres at high temperature.

It's used in torpedo car throats, ladle spouts and lip rings, tundish over, quenching car ramps in coke oven batteries, eaf deltas, ...

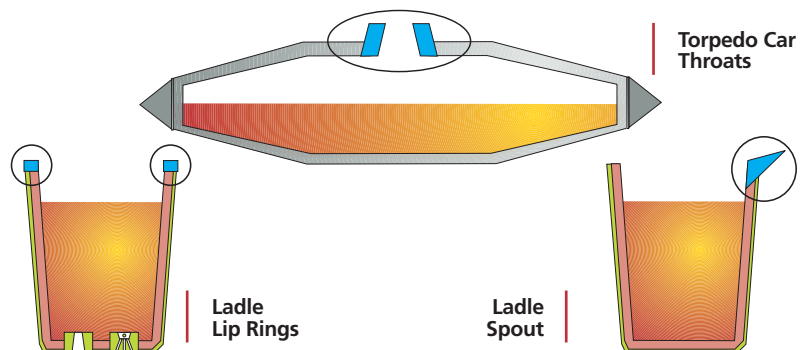

For more information, please contact our technical department.

## REPCAST HR STEEL APPLICATIONS

- Tundish Covers
- Torpedo Car Throats
- Ladle Covers
- Ladle Lip Rings
- Hot Metal Transfer Ladle Spouts
- Quenching Car Ramps
- EAF Delta
- EAF Roof
- EAF Slag Doors
- Drilling Machine Baking
- Drilling Machine Support
